

7-11 Express

The Express Box fits everything you love about 7-Eleven into a single sustainable and easy to transport carryall. The two-tiered drawer system allows for almost any combination of food items to be stored all in the same container, with room for a Big Gulp! The separation of these drawers also allows for proper temperature regulation for each food item, and prevents any unwanted cross-contamination.

The structure of the Express Box is engineered for a secure transport, featuring a stable, low center of gravity and a compact overall build that minimizes tipping or sliding during delivery. Crafted from a recycled cardboard composite, the Express Box is also environmentally considerate. This sustainable choice not only reflects our environmental commitment, but also provides a cost-effective solution that doesn't compromise on structural integrity.

By combining sustainable materials with practical design, we've created a delivery solution that lives up to the 7-Eleven promise of convenience. Whether you're ordering late-night snacks or midday meals, the Express Box delivers the complete 7-Eleven experience right to your door.
